

## Tulare Basin Watershed Connections Workgroup

### Workshop on Kings River Experimental Watershed's Educational Handouts

Background: Candace Toogood is an AmeriCorps Member serving with the Kings River Experimental Watersheds (KREW), which is a part of the Pacific Southwest Research Station of the USDA Forest Service. A part of her appointment, is to develop educational handouts for the general public about KREW's findings. She would like to get input from 5 to 10 people interested in the topic for perhaps 3 or 4 handouts.

#### **Goals of Handout:**

- To educate the public on KREW's findings
- To provide individuals information on local science results for discussion with their friends and colleagues
- To provide information that is understandable to a "junior high" level of education

#### **Goals for Participant Input:**

- Is the handout understandable to the general public?
  - If not, where is improvement needed?
- Can the organization of the handout be altered to be better understood or read?
- Grammatical corrections or alterations that would make handout more understandable to public
- Be specific and ideally provide comments on hardcopy or digital versions of handouts
- KREW topics they would like to know more about

Handout for background information:

- Project Overview

3 Handouts to Review:

- Drought
- Stream Flow
- Erosion and Sediment
